MURALIDHARAN S

Software Engineer

Panruti, Tamil Nadu | +91 6383091442 | dharani6383@gmail.com

LinkedIn | GitHub | Portfolio

SUMMARY

Software Engineer with hands-on experience in designing, developing, testing, and debugging software applications using Python, JavaScript, TypeScript, React.js, Node.js, Express.js, and FastAPI. Experienced in developing REST APIs, database-driven applications, frontend interfaces, authentication workflows, and AI-integrated applications. Strong foundation in software development, object-oriented programming, SQL, Git, API testing, debugging, and problem solving.

EDUCATION

Bachelor of Engineering (B.E.) – Computer Science and Engineering **2023 – 2027**

IFET College of Engineering, Anna University **CGPA: 8.70/10**

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, TypeScript, Java (Basics), SQL

Software Development: Object-Oriented Programming, Data Structures & Algorithms Basics, Problem Solving, Debugging, Exception Handling, Modular Programming

Frontend Development: React.js, Next.js, JSX, HTML5, CSS3, Tailwind CSS, Vite, React Router, Responsive Web Design

Backend Development: Node.js, Express.js, FastAPI, REST APIs, CRUD Operations, Middleware, API Integration, Server-side Development

Databases: MongoDB, Mongoose, MySQL, SQLite, SQL Queries, Database Design, CRUD Operations

Web Technologies: JSON, HTTP/HTTPS, Fetch API, Async/Await, Promises, LocalStorage, CORS, JWT, Authorization

Testing & Tools: Postman, Playwright, API Testing, Debugging, Git, GitHub, VS Code

Cloud & Deployment: AWS, Vercel, Netlify, Docker, Basic CI/CD

INTERNSHIP

Web Development & Digital Marketing Intern **February 2025**

LayerCodes Software Company, Villupuram

- Developed and improved responsive web pages using HTML, CSS, and JavaScript based on application requirements.
- Assisted in implementing frontend functionality and improving website usability and responsiveness.
- Performed testing, debugging, and troubleshooting to identify and resolve software issues.
- Gained practical experience with software development workflows and application testing.

PROJECTS

AI Interview System **May 2026**

React.js, FastAPI, Python, Ollama, MongoDB, PDF Parsing

- Developed a full stack AI interview application using React.js and FastAPI with REST API communication.
- Implemented resume upload and PDF parsing functionality to extract candidate information.
- Integrated Ollama for AI-powered interview question generation and interactive candidate responses.
- Designed backend APIs and integrated MongoDB for storing interview and application data.

SafeSphere – AI-Powered Emergency & Safety Application **March 2026**

Flutter, Dart, Python, Flask, SQLite, Google Maps API, WebSocket

- Developed an application with a Python Flask backend and SQLite database for emergency and safety functionality.
- Integrated Google Maps API and GPS services for location-based features.
- Implemented WebSocket communication for real-time application updates.

Brain Tumor Detection Using Python **February 2025**

Python, CNN, Deep Learning

- Developed a CNN-based deep learning model to classify MRI images as tumor or non-tumor.
- Implemented image preprocessing, model training, and evaluation for automated image classification.
